                                                                                                                                             WS-09-873-637-19
Sequence 19, Application US/09873637
Patent No. US20202061543A1
GENERAL INFORMATION:
APPLICANT: ROSS, Jeffrey
TITLE OF INVENTION: THE C-MYC CODING REGION DETERMINANT-BINDING PROTEIN
TITLE OF INVENTION: (CRD-BP) AND ITS NUCLEIC ACID SEQUENCE
FILE REFERENCE: 960296-95131
CURRENT APPLICATION NUMBER: US/09/873,637
CURRENT FILING DATE: 2001-06-04
NUMBER OF SEQ ID NOS: 46
SOFTWARE: PatentIn Ver. 2.0
SEQ ID NO 19
SEQ ID NO 19
TYPE: PRT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  233 CTCCTGGTGCCCACCCAGTATGTGGGTGCCATTATTGGCAAGGAGGGGGCCACCATCCGC 292

                                                                                                                                                                                                                                                                                                                                                             Sequence 17, Application US/09873637

Patent No. US20020061543A1

GENERAL INFORMATION:
TITLE OF INVENTION: HER C-MYC CODING REGION DETERMINANT-BINDING PROTEIN
TITLE OF INVENTION: (CRD-BP) AND ITS NUCLEIC ACID SEQUENCE
TITLE REPRENCE: 966296, 95131
CURRENT APPLICATION NUBER: US/09/873,637

CURRENT FILING DATE: 2001-06-04

NUMBER OF SEQ ID NOS: 46

SOFTWARE: Patentin Ver. 2.0

SEQ ID NO 17

LENGTH: 47
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              7 4 0 0 0 0 0

peptide (614-626), is correlated with peptide structure.";

FEBS Lett. 379:273-278(1996).

-I-FUNCTION: Secretogranin I is a neuroendocrine secretory granule protein, which may be the precursor for other biologically active peptides. The 16 pairs of basic AA distributed throughout its sequence may be used as proteolytic cleavage sites.

-I-FUNCTION: Secretolytin has antibacterial activity.

-I-SUBCELJULAR LOCATION: Neuroendocrine and endocrine secretory
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   TISSUE=Addenal chromaffin, MEDLINE=9526269; PubMed=7744058; Strub J.-M., Garcia-5ablone P., Lonning K., Taupenot L., Hubert P., Strub J.-M., Aunis D., Metz-Boutique M.-H.; Improcessing of chromogranin B in bovine adrenal medulla. Identification of secretolyth, the endogenous C-terminal fragment of Fesiques 614-626 with antibacterial activity."; Euchem. 229:356-368(1995).

"Molecular analysis of the DNA gyrB gene from Myxococcus xanthus.";
Microblology 144:1647(1998).

-: FUNCTION: DNA gyrase negatively supercoils closed circular double-
stranded DNA in an ATP-dependent manner and also catalyzes the
interconversion of other topological isomers of double-stranded
DNA rings, including catenanes and knotted rings.

-: CATALYTIC ACTIVITY: ATP-dependent breakage, passage and rejoining
of double-stranded DNA:
- SUBUNIT: Made up of two chains: The A chain is responsible for DNA
breakage and rejoining; the B chain catalyzes ATP hydrolysis. The
enzyme forms an A2B2 tetramer.
-: SIMILARITY: Belongs to the type II topoisomerase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Mycoplasma pneumoniae.

Patent No. US20020115139A1
GENERAL INFORMATION:
APPLICANT: Kalos, Michael D.
APPLICANT: Retter, Marc W.
TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE THERAPY
TITLE OF INVENTION: AND DIAGNOSIS OF LUNG CANCER
FILE REFERENCE: 210121.455C15

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
